ARE WE PREDISPOSED TO BEHAVE SECURELY?
INFLUENCE OF RISK DISPOSITION
ON INDIVIDUAL SECURITY BEHAVIORS

Better Understanding
More Effective Interventions

OUR FOCUS:
Are Some Individuals **Predisposed** To **Taking** Security Risks?

![Conceptual Risk Decision Model](image)

**RESEARCH DESIGN**

1) measure individual dispositional variables with established scales,
2) manipulate situational variables (such as levels of threat and sanctions, hold other variables constant,
3) Measure associations with (or impacts on) the behavioral intent either to comply with, or violate, information security policies.
